

BAE Systems Submarines Fabrication Department won the Sandvik Coromant Award for Process Innovation at the Institution of Mechanical Engineers' prestigious Manufacturing Excellence Awards 2004.

Project Management

BAE SYSTEMS Submarines division offers impressive flexibility in its response to customer requirements. The level of involvement ranges from a single phase of the fabrication process, through modular build, to the formulation of a total Project Package in which the company's project management expertise is combined with extensive planning and production control skills.

This flexible selective approach ensures that customer requirements are swiftly and accurately interpreted and transformed into an end product or package that is delivered to specification, to cost and on time - every time.
