

**A STAR IS BORN.
RAD-HARD, NON-VOLATILE, HIGH-DENSITY C-RAM.™**

BAE Systems introduces C-RAM™, the new star in the memory world. Our C-RAM family of products has been designed to withstand exceptionally harsh radiation environments. The new 4Mbit devices deliver 40 percent better access times, 4 to 16 times higher densities, and increased system performance over their predecessors. This enables them to leapfrog alternative non-volatile memory technologies in the space market. Our technological expertise means better radiation protection, durability, and reliability to give future spacecraft missions a real advantage.

BAE SYSTEMS

REAL PERFORMANCE. REAL ADVANTAGE.
