HELMET UPGRADE KITS

BAE Systems' Suspension and Retention Upgrade Kits allow the wearer to enhance the comfort and protection level of the issue helmet by removing the issue chin strap and suspension system and installing the Upgrade Kit. The kit will work with all makes of PASGT helmets using the 8-hole configuration, as well as the ACH.

Suspension and retention kits

Ballistic Helmets

FEATURES

- Designed for superior performance in the harshest conditions
- Designed for optimal comfort
- Wide range of helmets to address specific weight and ballistic requirements
- Combat proven

SUPERIOR PERFORMANCE, OPTIMAL COMFORT

COMBAT PROVEN

HELMET LINE

The **Warrior Helmet** line offers a cutting-edge design based on the ACH geometry that includes a pad-fit suspension system and a four-point chin strap. The design provides the user with increased aural perception, eases acquiring a sight picture and does not interfere with a body armor system.

The **Mid- and High-Cut Helmets** share many of the same features as the Warrior helmet but offers a raised ear for integration with communications headsets.

Standard Mil-Spec design **USMC Lightweight Helmet** offers coverage from ballistic threats and fragmentation. This helmet includes a pad-fit suspension system and a 4-point chinstrap.

The **Combat Vehicle Crewman Helmet** includes a Nomex inner liner with split pad set for comfort.

The **Thin Shell Combat Vehicle Crewman Helmet** is a lighter weight option at a lower ballistic performance level.

BAE Systems' helmets are the next-generation in lightweight, high-performance protection. Our helmets are designed for maximum comfort and protection and incorporate the latest technology in ballistic composite construction. We offer a range of helmet options to suit your mission needs, with varying weights and protection levels, as well as ballistic and non-ballistic face shields.

- Two-component polyurethane paint allows decontamination after exposure to liquid chemical agents
- Adjustable and replaceable chin straps
- Comfort pad suspensions, available on all combat helmets, provide a stable, comfortable fit
- State-of-the-art ballistic composite construction
- Integration compatibility with NVG systems

HELMET SPECIFICATIONS

STYLE #	DESCRIPTION	SIZES	WEIGHT (MED. HELMET)	17 GRAIN V ₅₀	9MM	EQUIVALENT TO NIJ LEVEL IIA	EQUIVALENT TO NIJ LEVEL IIIA
2412	Warrior HB Lightweight, high ballistic protection	S-XL	49 oz	2100 fps	1400 fps		•
2360	High Ballistic CVC Excellent ballistic protection, complete with liner, pads, and MK 1697/G communications kit	S-L	65 oz	2150 fps	N/A	N/A	N/A
