

## HAP

### Helmet Attachment Platform

#### KEY FEATURES

- Modular mounting platform for helmet-worn gear
- Compatible with all sizes of ACH and MICH
- Picattiny rail for universal hardware
- Extended side mounts for goggle straps and oxygen mask receptacle
- Eliminates unreliable attachment methods

# QUALITY HELMET GEAR MOUNTING PLATFORM

## SYSTEM FEATURES

- Picatinny rail for lights/cameras/etc.
- Reversible plate fits all standard NVGs
- Built-in NVG lanyard
- Modular mounts for popular lights
- Cable Management architecture
- Goggle pivots
- O<sub>2</sub> Mask Receptacle
- Battery/counterweight landing
- IFF Rail or TRON strap
- Allows para-jumpers to use one helmet for entire mission

The ECLIPSE® Helmet Attachment Platform (HAP) is a modular solution that allows the secure attachment of common gear to all ACH and MICH helmets without modification to the helmet.

The HAP was designed to provide a stable platform to secure gear such as night vision goggles and counterweights, lights, cameras and IR beacons. The system incorporates a universal NVG mount, NVG lanyard and NVG cover holder that accepts both Wilcox and Norotos hardware.

The unique ear mounts provide a tight, positive retention of integrated goggles as well as an oxygen mask receptacle for use during HAHO/HALO jumps–

eliminating the need for a secondary helmet to accomplish these missions. Two picatinny rails allow for lights, camera and other hardware attachment. The HAP system also includes cable management to secure communication wires.

The HAP attaches to the helmet using existing chinstrap holes and does not require a NVG mount hole, but can be used with one. An over-the-head platform for IR beacons and a counterbalance mount on the back of the helmet help to relieve neck strain.

Attachments come in combination sizes of small/medium and large/extra large.

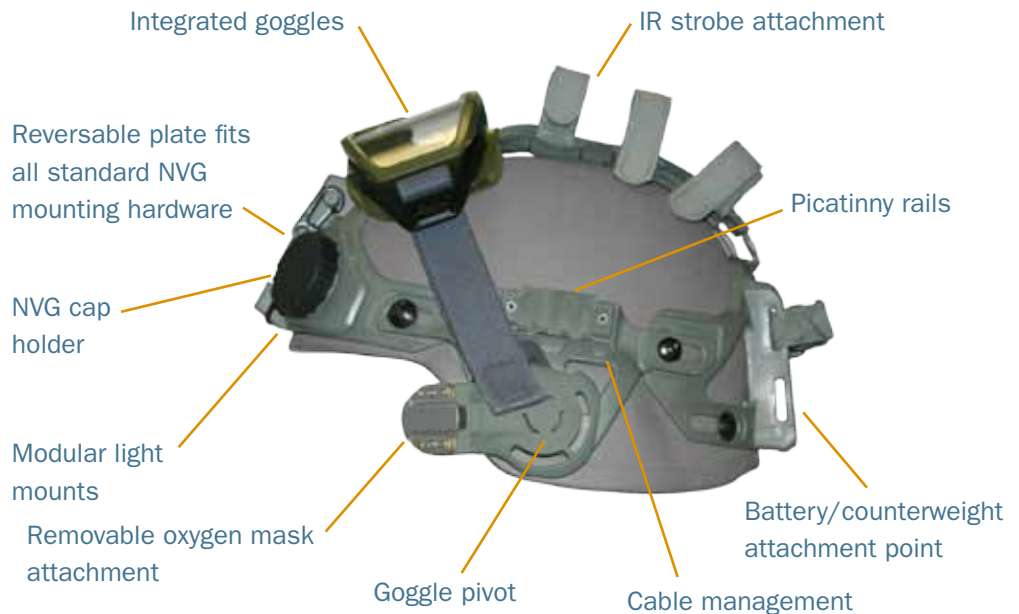

NVG, IR strobe and modular light not included

 ECLIPSE® Performance Gear is made in the USA.
