

Project Management

BAE Systems Saudi Arabia is recognised by the Company as the Home Market Custodian for the Kingdom of Saudi Arabia (KSA) responsible for the continued evolution of existing KSA contracts, development of the KSA industrial base, and the growth of new business.

Our Company performance is dependent upon the successful winning and execution of Projects. Being a project management graduate any where within BAE Systems you will be expected to contribute to ensuring projects are delivered on time to cost and managing stakeholder expectations. However, as a BAE Systems Saudi Arabia graduate these core project management skills become immensely challenging due to the diverse cultures and environments we operate in, it is these challenges that you will be expected to overcome using your creativity, innovation, and self-motivation.

As a project management graduate within BAE Systems Saudi Arabia you will be working closely with other functions often in integrated teams including, commercial, procurement, supply chain, finance, and Engineering. This will give you the opportunity to increase your business awareness very quickly.

As an asset to BAE Systems Saudi Arabia you will be expected to identify and pursue development and training needs. As a minimum you will be expected to achieve APM certification in Project Management. You will also be encouraged and given opportunities to build on your 'soft' skills to equip you for your career ahead.

Initial job expectations from the graduate are to be proactive, show creativity and innovation, and quickly learning the disciplines within the business. Responsibilities quickly increase to leading meetings and delivering elements of the project requirements. As you progress the graduate scheme you will be seen as a 'talented individual' expected to plan & deliver project elements with minimal supervision, you will be expected to manage internal and external stakeholders to ensure successful project outcomes.

BAE Systems Saudi Arabia has a diverse portfolio of projects which gives you opportunity to build on the diverse skills required to be a successful project manager. These include:

- Product Orientated Projects, for external customers: Aircraft, Land Vehicles, Weapons, Upgrades etc.
- Bid Teams and Sales: Offering the most effective solutions to the customer, increasing chances of contract award.
- IT Project: Internal IT projects.
- Change Projects: Changing the way we conduct our business to achieve long term business Sustainment & benefits.
